Activity 1: SWOT Analysis Problem statement :- Conduct a self assessment to identify your personal strengths weaknesses, opportunities, and threats and analyze how these factors can influence your career choices and development Identifying SWOT Components → S- strengths W- Weaknesses O- opportunities T- Threat. It helps analyse these 4 aspects. We can then align strengths with weaknesses to maximize competitive advantage. Mitigating weaknesses by addressing threats and creating action plans help us achieve our goals. Personal Reflection :- Strengths- After significant deliberation, I realized that my strength is my mindset. I have a strong will to continuously challenge and better myself. Secondly, I am a very good orator. A judge in one of my MUNs complimented me saying that I have

Page 2

a gift of speech - when I speak people listen. And I believe that is what makes me a good leader also I've got great listening skills and soft skills. Weaknesses - I have very little technical knowledge and that leaves me in a bad mental health space. I procrastinate a lot which is my major weakness. I also have devised an 'anchor-system' to fight my weaknesses. Opportunities - I see a lot of opportunities around me. There are various hackatons and courses being conducted and I can utilize them to boost my resume and learning. Additionally, I'd like to contribute to the open source communities and also do freelancing. Threats - One of the major threats in my view is the growing saturation in the tech industry. To fight this I believe one needs to be the master of their craft. Additionally, AI tools also pose a major threat to individuality.

Analysis of impact on careers:- This activity helped me realize that I need to choose managerial roles. I am cut for a than multi-specialized careers rather than work a niche one. Albeit, I will work harder for my start up ideas so that I can channelize my personal skillset to a more efficient use leading to holistic development. Learning Outcomes:- This activity helped me analyse key areas to focus on to maximize success rates.

Page 4

Activity 2: Public speaking Problem statement :- Research and present the importance of public speaking skills for engineers, and practice techniques to enhance clarity and persuasion in technical presentations. Importance of public speaking for engineers:- 1. Public speaking bolsters leadership abilities. The capacity to inspire, motivate and guide others is fundamental in every sphere of life. 2. Being able to publicly convey your ideas is one of the most powerful ways to gain that buy-in and flourish in your career. You must be able to articulate complex technical concepts in non-technical language and layperson's terms. 3. Professional credibility - polished presentation ions help engineers stand out in the workplace, build trust with colleagues and clients. Techniques to enhance presentation skills Persuasion isn't science - its an art, and its not as easy as it sounds. Persuasions has 3 components :-

Page 5

Ethos (credibility) Logos (logic) Pathos (emotion). 1. Connect with your audience. 2. Mind your Body language. 3. Use complementary visual aids. 4. Utilize social proof theory. 5. Present a story. 6. Be

credible and attractive. 7. Strategize your content flow. Personal reflection on skills gained :- I learnt to put forward my ideas more clearly into words. I learnt the the what flow should my speeches take and what words need to be emphasised. I realised the significance of speaking even though at times it pertains to me one simply re-ascering and accentuating one's ideology again.

Page 6

Activity 3 Reading and Listening skills. Problem Statement :- Apply techniques to improve active listening and critical reading skills, and demonstrate how to effectively extract key information from technical papers and reports. • Techniques to improve active listening :- 1. stay focused. 2. Take notes. 3. Ask questions. 4. Summarize key points 5. Non-verbal feedback. 6. Assume that you have to teach the same to someone. • Techniques to improve critical reading :- 1. Preview the paper. 2. Active Questioning. 3. Annotate the text 4. Identify Structure. 5. Evaluate evidence. 6. Look for patterns. 7. Summarize the paper. • Demonstration of extracted information. 1. Title and Abstract - 2. Identify scope of research. 3. Introduction :- A strong introduction

Page 7

catches the attention of the reader. 4. Discuss the topic and come up with a conclusion. Reflections on improvements:- - When listening to a talk or a discussion take notes on the key technical terms used. - Read papers carefully, using annotations and asking questions about methodology and findings. Compare the results with other studies. - After practising these techniques regularly, I improved my listening and reading skills, being able to extract useful information from technical literature.

Page 8

Activity 4: Group Discussion Problem Statement :- Participate in a GD to evaluate best practices, focusing on body language, communication tone and structuring arguments effectively. Topic :- Future of work with AI :- Discuss how AI will transform the job market and the skills needed to thrive in the future. Overview of discussion topics :- The discussion began with statistics of how many jobs would be lost and how many would be created if the current trends continue. AI would replace redundant jobs whereas one in data analysis, data sciences would see a rise. Some people were of the opinion that AI can be our companion in making our lives easier. It would augment tasks rather than automating. However others argued that excessive use of AI would lead to loss of identity. Ethics and credibility of AI were also addressed - how using AI could lead to privacy breaches. On the brighter side, AI would help simulations, medical, business and automotive

Page 9

sectors to boom. Analysis of communication styles: some students delivered powerful and influential speeches, which bound the audience in a spell to comply with them while others has a more deb-descriptive style. Some strong opinionated individuals has aggressive debatable stances but maintained the decorum of the group discussion. Reflection and personal contribution:- I contributed by giving the introductory speech and setting up the stage for everyone to discuss and thrive on. I tried to maintain a significant statistical backing for the facts I produced. I touched various topics covering multiple facets to allow the discussion a more abstract flow. However I believe that I could have been a little bit more empathetic in my oration. I should have expanded my thoughts more. That would happen when I would begin to fully own the podium without the thought of taking others' time. Using fancies phrases and more emphasised speech would be my next milestones to achieve

Page 10

5. Letter / Application writing Problem statement: Write a formal letter for an internship or job, demonstrating knowledge of structure, tone and format required in professional writing. Utsavi Bagri, 202, Angira Woods, Shirsoli Road, Jalgaon - 425001 utsavibagri@gmail.com 9423977466 Date :- October 17th, 2024, To, Mr. Sharma, H.R. Head, High Tower Capital Ltd, Two Horizon Centre, DLF Phase-5 sector-43, Gurugram, Haryana - 122002 Dear Mr Sharma, I am writing to express my interest in the software developer research position listed on your LinkedIn page. with my background in CS, along with

Page 11

hands on experience in development, I am confident that I can make significant contribution in the company. I am particularly excited about the opportunity at High Towers because of your innovative approach to study and decipher stock markets. I would welcome the chance to contribute to your team and grow professionally within your organization. Thank you for considering my application.
